Mathematics at Beaconhill

Curriculum Intent

What Mathematics looks like at Beaconhill:

- At Beaconhill, we have a commitment to improving attainment for all. We follow a 'mastery approach' to the teaching of Mathematics. We believe that children master the curriculum when they can apply their learning to new situations .
- We use concrete manipulatives and a range of representations in each classroom. These help children to see patterns and make connections.
- Whole class teaching enables us to make concepts available to all children and fluid mixed ability groups, triads and pairings are used.
- We develop 'greater depth' by encouraging children to apply their knowledge at pace, to real life situations and to a range of problems presented in different ways .

Tro bindred and rightly Gre

A mathematician at Beaconhill Primary School should have:

- An understanding of the important concepts and an ability to make connections within mathematics.
- A broad range of skills in using and applying mathematics.
- Fluent knowledge and recall of number facts and the number system.
- The ability to show initiative in solving problems in a wide range of contexts, including the new or unusual.
- The ability to think independently and to persevere when faced with challenges, showing a confidence of success .
- The ability to embrace the value of learning from mistakes and false starts.
- The ability to reason, generalise and make sense of solutions .
- Fluency in performing written and mental calculations and mathematical techniques .
- A wide range of mathematical vocabulary.
- A commitment to and passion for mathematics.

A BAT OAA LANGUIG OF CAMPAGE AND THE CONTROL OF THE

Mathematics at Beaconhill

Curriculum Overview

	Autumn One	Autumn Two	Spring One	Spring Two	Summer One	Summer Two
Year One	Previous Reception experiences and counting within 100	Comparison of quantities and part—whole relationships. Numbers 0 to 5 Recognise, compose, decompose and manipulate 2D and 3D shapes	Recognise, compose, decompose and manipulate 2D and 3D shapes Numbers 0 to 10 Additive structures Addition and subtraction facts within 10	Additive structures Addition and subtraction facts within 10	Numbers 0 to 20	Unitising and coin recognition Position and direction Time
Year Two	Numbers 10 to 100 Calculations within 20	Fluently add and subtract within 10 Addition and subtraction of two-digit numbers (1) Introduction to multiplication	Introduction to multiplication Introduction to division structures	Shape Addition and subtraction of two-digit numbers (2)	Money Fractions Time Position and direction	Multiplication and division – doubling, halving, quotitive and partitive division Sense of measure – capacity, volume, mass
Year Three	Adding and subtracting across 10 Numbers to 1,000	Numbers to 1,000	Right angles Manipulating the additive relationship and securing mental calculation	Column addition 2, 4, 8 times tables Column subtraction	Unit fractions	Non-unit fractions Parallel and perpendicular sides in polygons Time
Year Four	Review of column addition and subtraction Numbers to 10,000	Perimeter 3, 6, 9 times tables	3, 6, 9 times tables 7 times table and patterns Understanding and manipulating multiplicative relationships	Understanding and manipulating multiplicative relationships Coordinates	Review of fractions Fractions greater than 1	Symmetry in 2D shapes Time Division with remainders
Year Five	Decimal fractions Money	Negative numbers Short multiplication and short division	Area and scaling Calculating with decimal fractions	Calculating with decimal fractions Factors, multiples and primes	Fractions	Converting units Angles

Year Six	Calculating using knowledge of structures (1)	Multiples of 1,000	Multiplication and Division *	Fractions and Percentages *	Statistics	Calculating Using Knowledge of Structures
*Denotes adapted teaching order to NCETM	Multiples of 1,000	Numbers up to 10,000,000 Multiplication and Division *	Fractions and Percentages *	Draw, compose and decompose shapes * Area, Perimeter, Position and Direction *	Ratio and Proportion	Solving Problems Using Two Unknowns Order of Operations (also taught in arithmetic lessons throughout Y6) Mean Average

Mathematics at Beaconhill

Skills Progression

Number and Place Value

	COUNTING						
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number			count backwards through zero to include negative numbers	interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero	use negative numbers in context, and calculate intervals across zero		
count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens	count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward	count from 0 in multiples of 4, 8, 50 and 100;	count in multiples of 6, 7, 9, 25 and 1 000	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000			
given a number, identify one		find 10 or 100 more or less than	find 1 000 more or less than a				
more and one less		a given number	given number				
	COMPARING NUMBERS						
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
use the language of: equal to, more than, less than (fewer), most, least	compare and order numbers from 0 up to 100; use <, > and = signs	compare and order numbers up to 1 000	order and compare numbers beyond 1 000 compare numbers with the same	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also		
			number of decimal places up to two decimal places (copied from Fractions)	(appears also in Reading and Writing Numbers)	in Reading and Writing Numbers)		
	IDEN	ITIFYING, REPRESENTING	AND ESTIMATING NUM	BERS			
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
identify and represent numbers using objects and pictorial representations including the number line	identify, represent and estimate numbers using different representations, including the number line	identify, represent and estimate numbers using different representations	identify, represent and estimate numbers using different representations				
	READ	ING AND WRITING NUM	BERS (including Roman N	umerals)			
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		

read and write numbers from 1 to 20 in numerals and words.	read and write numbers to at least 100 in numerals and in words	read and write numbers up to 1 000 in numerals and in words		read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Comparing Numbers)	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Understanding Place Value)
		tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks (copied from Measurement)	read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.	read Roman numerals to 1 000 (M) and recognise years written in Roman numerals.	Trace value)

		UNDERSTANDIN	IG PLACE VALUE		
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	recognise the place value of each digit in a two-digit number (tens, ones)	recognise the place value of each digit in a three-digit number (hundreds, tens, ones)	recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) find the effect of dividing a one-or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths (copied from Fractions)	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers) recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (copied from Fractions)	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers) identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1 000 where the answers are up to three decimal places (copied from Fractions)
		ROUN	IDING		
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
			round any number to the nearest 10, 100 or 1 000	round any number up to 1 000 000 to the nearest 10, 100, 1 000, 10 000 and 100 000	round any whole number to a required degree of accuracy
			round decimals with one decimal place to the nearest whole number (copied from Fractions)	round decimals with two decimal places to the nearest whole number and to one decimal place (copied from Fractions)	solve problems which require answers to be rounded to specified degrees of accuracy (copied from Fractions)

Mathematics at Beaconhill

	PROBLEM SOLVING								
Year 1	Year 1 Year 2 Year 3 Year 4 Year 5 Year 6								
	use place value and number facts to solve problems	solve number problems and practical problems involving these ideas.	solve number and practical problems that involve all of the above and with increasingly large positive numbers	solve number problems and practical problems that involve all of the above	solve number and practical problems that involve all of the above				

Number Addition & Subtraction

	NUMBER BONDS							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
represent and use number bonds and related subtraction facts within 20	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100							
		MENTAL C	ALCULATION					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
add and subtract one-digit and two-digit numbers to 20, including zero	add and subtract numbers using concrete objects, pictorial representations, and mentally, including: * a two-digit number and ones * a two-digit number and tens * two two-digit numbers * adding three one-digit numbers	add and subtract numbers mentally, including: * a three-digit number and ones * a three-digit number and tens * a three-digit number and hundreds		add and subtract numbers mentally with increasingly large numbers	perform mental calculations, including with mixed operations and large numbers			
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Written Methods)	show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot				use their knowledge of the order of operations to carry out calculations involving the four operations			

	WRITTEN METHODS							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Mental Calculation)		add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)				
	INVERS	E OPERATIONS, ESTIMA	ATING AND CHECKING A	NSWERS				
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	estimate the answer to a calculation and use inverse operations to check answers	estimate and use inverse operations to check answers to a calculation	use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.			

	PROBLEM SOLVING								
Year 1	Year 1 Year 2 Year 3 Year 4 Year 5 Year 6								
solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = [] - 9	solve problems with addition and subtraction: * using concrete objects and pictorial representations, including those involving numbers, quantities and measures * applying their increasing knowledge of mental and written methods	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction	solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why				

Mathematics at Beaconhill

solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change (copied from Measurement)		Solve problems involving addition, subtraction, multiplication and division

Multiplication & Division

	MULTIPLICATION & DIVISION FACTS							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
count in multiples of twos, fives and tens (copied from Number and Place Value)	count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward (copied from Number and Place Value)	count from 0 in multiples of 4, 8, 50 and 100 (copied from Number and Place Value)	count in multiples of 6, 7, 9, 25 and 1 000 (copied from Number and Place Value)	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 (copied from Number and Place Value)				
	recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers	recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	recall multiplication and division facts for multiplication tables up to 12 × 12					
		MENTAL CALCU	JLATION					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
		write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (appears also in Written Methods)	use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers	multiply and divide numbers mentally drawing upon known facts	perform mental calculations, including with mixed operations and large numbers			
	show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot		recognise and use factor pairs and commutativity in mental calculations (appears also in Properties of Numbers)	multiply and divide whole numbers and those involving decimals by 10, 100 and 1000	associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. ³ / ₈) (copied from Fractions)			

	WRITTEN CALCULATION							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
	calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (x), division (÷) and equals (=) signs	write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (appears also in Mental Methods)	multiply two-digit and three-digit numbers by a one-digit number using formal written layout	multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers	multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication			
				divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context	divide numbers up to 4-digits by a two-digit whole number using the formal written method of short division where appropriate for the context divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context			
					use written division methods in cases where the answer has up to two decimal places (copied from Fractions (including decimals))			

AT BACOMIL NI.

	PROPERTIES OF NUMBERS: MULTIPLES, FACTORS, PRIMES, SQUARE AND CUBE NUMBERS								
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6				
			recognise and use factor pairs and commutativity in mental calculations (repeated)	identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers. know and use the vocabulary	use common factors to simplify				
				of prime numbers, prime factors and composite (non-prime) numbers establish whether a number up to 100 is prime and recall prime numbers up to 19	fractions; use common multiples to express fractions in the same denomination (copied from Fractions)				
				recognise and use square numbers and cube numbers, and the notation for squared (²) and cubed (³)	calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm³) and cubic metres (m³), and extending to other units such as mm³ and km³ (copied from Measures)				

	ORDER OF OPERATIONS									
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6					
					use their knowledge of the order of operations to carry out calculations involving the four operations					
	INVER	SE OPERATIONS, ESTIMA	ATING AND CHECKING A	NSWERS						
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6					
		estimate the answer to a calculation and use inverse operations to check answers (copied from Addition and Subtraction)	estimate and use inverse operations to check answers to a calculation (copied from Addition and Subtraction)		use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy					

	PROBLEM SOLVING									
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6					
solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher	solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects	solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects	solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign	solve problems involving addition, subtraction, multiplication and division					
				solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates	solve problems involving similar shapes where the scale factor is known or can be found (copied from Ratio and Proportion)					

Mathematics at Beaconhill

Fractions (including decimals & percentages)

	COUNTING IN FRACTIONAL STEPS									
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6					
	Pupils should count in fractions up to 10, starting from any number and using the 1/2 and 2/4 equivalence on the number line (Non Statutory Guidance)	count up and down in tenths	count up and down in hundredths							
		RECOGNISING	G FRACTIONS							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6					
recognise, find and name a half as one of two equal parts of an object, shape or quantity	recognise, find, name and write fractions ${}^1\!/_3$, ${}^1\!/_4$, ${}^2\!/_4$ and ${}^3\!/_4$ of a length, shape, set of objects or quantity	recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators recognise that tenths arise from dividing an object into 10 equal parts and in dividing one – digit numbers or quantities by 10.	recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (appears also in Equivalence)						
recognise, find and name a quarter as one of four equal parts of an object, shape or quantity		recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators								

_										
	COMPARING FRACTIONS									
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6				
			compare and order unit fractions, and fractions with the same denominators		1 '	compare and order fractions, including fractions >1				
	COMPARING DECIMALS									
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6				

			,								
			compare numbers with the	read, write, order and compare	identify the value of each digit in						
			same number of decimal places	numbers with up to three decimal	numbers given to three decimal						
			up to two decimal places	places	places						
	ROUNDING INCLUDING DECIMALS										
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6						
			round decimals with one	round decimals with two decimal	solve problems which require						
			decimal place to the nearest	places to the nearest whole number	answers to be rounded to						
			whole number	and to one decimal place	specified degrees of accuracy						
	EQUIVALENCE (INCLUDING FRACTIONS, DECIMALS AND PERCENTAGES)										
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6						
	write simple fractions e.g. $\frac{1}{2}$ of 6 =	recognise and show, using	recognise and show, using	identify, name and write equivalent	use common factors to simplify						
	3 and recognise the equivalence of	diagrams, equivalent fractions	diagrams, families of common	fractions of a given fraction,	fractions; use common multiples						
	$^{2}/_{4}$ and $^{1}/_{2}$.	with small denominators	equivalent fractions	represented visually, including	to express fractions in the same						
				tenths and hundredths	denomination						
			recognise and write decimal	read and write decimal numbers as	associate a fraction with division						
			equivalents of any number of	fractions (e.g. $0.71 = {}^{71}/_{100}$)	and calculate decimal fraction						
			tenths or hundredths		equivalents (e.g. 0.375) for a						
					simple fraction (e.g. ³ / ₈)						
				recognise and use thousandths and	1						
				relate them to tenths, hundredths							
				and decimal equivalents							
			recognise and write decimal	recognise the per cent symbol (%)	recall and use equivalences						
			equivalents to ¹ / ₄ ; ¹ / ₂ ; ³ / ₄	and understand that per cent relates	between simple fractions,						
			7. 12. 17	to "number of parts per hundred",	decimals and percentages,						
				and write percentages as a fraction	including in different contexts.						
				with denominator 100 as a decimal							
				fraction							
		ADDITION AND SUBTR	ACTION OF FRACTIONS								
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6						
		add and subtract fractions with	add and subtract fractions with the	add and subtract fractions with	add and subtract fractions with						
		the same denominator within one	same denominator	the same denominator and	different denominators and mixed						
		whole (e.g. ${}^{5}/_{7} + {}^{1}/_{7} = {}^{6}/_{7}$)		multiples of the same number	numbers, using the						
					concept of equivalent fractions						

		recognise mixed numbers and	
		improper fractions and convert	
		from one form to the other and	
		write mathematical statements >	
		1 as a mixed number (e.g. $^2/_5 + ^4/_5$	
		$= {}^{6}/_{5} = 1^{1}/_{5}$	

MULTIPLICATION AND DIVISION OF FRACTIONS									
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6				
				multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams	multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. $^1/_4 \times ^1/_2 = ^1/_8$) multiply one-digit numbers with up to two decimal places by whole numbers				
					divide proper fractions by whole numbers (e.g. $^{1}/_{3} \div 2 = ^{1}/_{6}$)				

	MULTIPLICATION AND DIVISION OF DECIMALS									
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6					
					multiply one-digit numbers with up to two decimal places by whole numbers					
			find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths		multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places					
					identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100					

Mathematics at Beaconhill

	1				and 1000 where the answers are		
					up to three decimal places		
					associate a fraction with division		
					and calculate decimal fraction		
					equivalents (e.g. 0.375) for a		
					simple fraction		
					(e.g. ³ / ₈)		
					use written division methods in		
					cases where the answer has up		
					to two decimal places		
	ı						
PROBLEM SOLVING

Ratio & Proportion

Statements onl	Statements only appear in Year 6 but should be connected to previous learning, particularly fractions and multiplication and division						
					Year 6		
					solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts		
					solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison		

Mathematics at Beaconhill

		solve problems involving similar shapes where the scale factor is known or can be found
		solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.

Algebra

EQUATIONS									
Year 2	Year 3	Year 4	Year 5	Year 6					
recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (copied from Addition and Subtraction)	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. (copied from Addition and Subtraction) solve problems, including missing number problems, involving multiplication and division, including integer scaling (copied from Multiplication and Division)		use the properties of rectangles to deduce related facts and find missing lengths and angles (copied from Geometry: Properties of Shapes)	express missing number problems algebraically					
recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 (copied from Addition and Subtraction)				find pairs of numbers that satisfy number sentences involving two unknowns enumerate all possibilities of combinations of two variables					
	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (copied from Addition and Subtraction) recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 (copied from Addition and	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. 			/ such as a.m./p.m., morning, after midnight (appears also in Telling t				
			MEASURING and CA	ALCUL	ATING		
Year 1	Year 2		Year 3		Year 4	Year 5	Year 6
measure and begin to record the following: * lengths and heights * mass/weight * capacity and volume * time (hours, minutes, seconds)	choose and use appropriate star units to estimate and measure length/height in any direction (r mass (kg/g); temperature (°C); c (litres/ml) to the nearest approp using rulers, scales, thermomete measuring vessels	m/cm); :apacity riate unit,	measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)	calcula measu in pou	te, compare and ate different ares, including money nds and pence ars also in Comparing)	use all four operations to solve problems involving measure (e.g. length, mass, volume, money) using decimal notation including scaling.	solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate (appears also in Converting)

	measure the perimeter of simple 2-D shapes	measure and calculate the perimeter of a rectilinear		recognise that shapes with the same areas can have different
		figure (including squares) in centimetres and metres	rectilinear shapes in centimetres and metres	perimeters and vice versa

	MEASURING and CALCULATING								
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6				
recognise and know the value of different denominations of coins and notes	recognise and use symbols for pounds (£) and pence (p) ; combine amounts to make a particular value	add and subtract amounts of money to give change, using both £ and p in practical							
	find different combinations of coins that equal the same amounts of money	contexts							
	solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change								
			find the area of rectilinear shapes by counting squares	calculate and compare the area of squares and rectangles including using standard units, square centimetres (cm²) and square metres (m²) and estimate the area of irregular shapes recognise and use square numbers and cube numbers, and the notation for squared (²) and cubed (³) (copied from Multiplication and Division)	calculate the area of parallelograms and triangles calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm³) and cubic metres (m³), and extending to other units [e.g. mm³ and km³].				
					recognise when it is possible to use formulae for area and volume of shapes				
		TELLING THE							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6				

tell the time to the hour and half past the hour and draw the hands on a clock face to	tell and write the time to five minutes, including quarter past/to	tell and write the time from an analogue clock, including using	read, write and convert time between analogue and digital 12 and 24-hour		
show these times.	the hour and draw the hands on a clock face to show these times.	Roman numerals from I to XII, and 12-hour and 24-hour clocks	clocks (appears also in Converting)		
recognise and use language relating to dates, including days of the week, weeks, months and years	know the number of minutes in an hour and the number of hours in a day. (appears also in Converting)	estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		
		a.m./p.m., morning, afternoon, noon and midnight (appears also in Comparing and Estimating)			
			solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days (appears also in Converting)	solve problems involving converting between units of time	

	CONVERTING								
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6				
	know the number of minutes in an hour and the number of hours in a day. (appears also in Telling the Time)	know the number of seconds in a minute and the number of days in each month, year and leap year	convert between different units of measure (e.g. kilometre to metre; hour to minute)	convert between different units of metric measure (e.g. kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)	use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places				
			read, write and convert time between analogue and digital 12 and 24-hour clocks (appears also in Converting)	solve problems involving converting between units of time	solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate (appears also in Measuring and Calculating)				

Mathematics at Beaconhill

solve problems involving	understand and use	convert between miles and
converting from hours to	equivalences between metric	kilometres

Time)		

Geometry – Properties of Shape

	IDENTIFYING SHAPES AND THEIR PROPERTIES							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
recognise and name common 2-D and 3-D shapes, including: * 2-D shapes [e.g. rectangles (including squares), circles and triangles] * 3-D shapes [e.g. cuboids (including cubes), pyramids and spheres].	identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]		identify lines of symmetry in 2-D shapes presented in different orientations	identify 3-D shapes, including cubes and other cuboids, from 2-D representations	recognise, describe and build simple 3-D shapes, including making nets (appears also in Drawing and Constructing) illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius			
		DRAWING AND	CONSTRUCTING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
		draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them	complete a simple symmetric figure with respect to a specific line of symmetry	draw given angles, and measure them in degrees (°)	draw 2-D shapes using given dimensions and angles recognise, describe and build simple 3-D shapes, including making nets (appears also in Identifying Shapes and Their			
		COMPADING AN	I ID CLASSIFYING		Properties)			
		COMPARING AN	ID CLASSIFTING					

Mathematics at Beaconhill

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	compare and sort common 2-D and 3-D shapes and everyday objects		compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes	use the properties of rectangles to deduce related facts and find missing lengths and angles distinguish between regular and irregular polygons based on reasoning about equal sides and angles	compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons
		AN	GLES		
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
		recognise angles as a property of shape or a description of a turn		know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles	
		identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle identify horizontal and vertical	identify acute and obtuse angles and compare and order angles up to two right angles by size	identify: * angles at a point and one whole turn (total 360°) * angles at a point on a straight line and ½ a turn (total 180°) * other multiples of 90°	recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles
		lines and pairs of perpendicular and parallel lines			

Geometry Position & Direction

POSITION, DIRECTION AND MOVEMENT							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		

Mathematics at Beaconhill

describe position, direction and movement, including half, quarter and three-quarter turns.	use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)		describe positions on a 2-D grid as coordinates in the first quadrant describe movements between positions as translations of a given unit to the left/right and up/down	identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed	describe positions on the full coordinate grid (all four quadrants) draw and translate simple shapes on the coordinate plane, and reflect them in the axes.
			plot specified points and draw sides to complete a given polygon		
		PAT	ΓERN		
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	order and arrange combinations of mathematical objects in patterns and sequences				

Statistics

INTERPRETING, CONSTRUCTING AND PRESENTING DATA								
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
	interpret and construct simple pictograms, tally charts, block diagrams and simple tables	interpret and present data using bar charts, pictograms and tables	interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs	complete, read and interpret information in tables, including timetables	interpret and construct pie charts and line graphs and use these to solve problems			
	ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity							

	ask and answer questions about totalling and comparing categorical data							
SOLVING PROBLEMS								
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
		solve one-step and two-step questions [e.g. 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.	solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.	solve comparison, sum and difference problems using information presented in a line graph	calculate and interpret the mean as an average
